Summary

I'm a Front-end Web Developer with over 3 years of development experience and a strong understanding of User Interface and User Experience. I use my skills to build mobile-responsive, optimized, accessible websites & web applications.

Technical Skills:

Airtable | Bootstrap | CSS3 & SASS (SCSS) | Elementor | Figma | Git | GitHub | Google Analytics | HTML5 | JavaScript (Chart.js, Anime.js) | Linux | Responsive Web Design | REST APIs | SEO | Webflow | WooCommerce | WordPress

Soft Skills:

Ability to Collaborate | Adapt Easily in a New Environment | Emotional Intelligence | Friendly Personality | Humility | Learning Fast | Problem-Solving | Process Improvement Expertise | Self-starter | Strong Work Ethic | Team Leadership

I have helped at least 3 clients scale their businesses by at least 30% over a 12-month period by building for them a high-ranking, sales-conversion website.

Experience

Web Content Writer

Decentralize Africa

Feb 2022 - Present (5 months +)

At Decentralize, I use my skills in content writing to create fascinating and informative contents that suit the blog.

I also employ my expertise in Search Engine Optimization to ensure that the contents I create for Decentralize help their website to rank higher on search engines.

Frontend Web Developer

unlimited.ng

Nov 2020 - Jul 2021 (9 months)

I was able to have a better grasp of JavaScript and also CSS pre-processors which made implementing complex designs easier.

The company hosted a web development Bootcamp where I taught 5 students HTML, CSS, and JavaScript to a confident level.

I collaborated with the marketing & design team where we redesigned the company's website to help convert, and bring in more clients.

I worked on over 15 unique projects in total over an 8-month period.
